

Astro Man Charlie Vitamine

Hello my friend, you gone and left me
But I really can't, can't accept it.
On the stones the rats, the rats looked at
you

In admiration, they were hating you
Hating you

In the fog seven arrows ... were passing
But they couldn't reach you ... no they
couldn't reach you
Cos you weren't looking ... looking at the
sky

Your new home, with new friends
With new friends

Look at the sun, sticks and smiles
Sticks of wood, to rhythm and blues
The sun took you back, back to the sky
Astro man, Gypsy man
Hello my friend, I wrote this song for you
I know you will take time for it
See you my friend, You know we're all
stars, little pieces of the universe
O my Astro man, welcome home
